PROFILE

Full Stack Web Developer with commercial experience building modern applications using React, Redux and WordPress. Experienced working fully remotely in international teams including a fast-paced digital agency and a leading supplier of electric heating in the UK. Seeking a frontend or full-stack role where I can use my technical knowledge and skillset to implement performant and secure features.

SKILLS

Frontend: HTML5, React, Next.js, Redux, Accessibility, Performance Optimisation

Styling: CSS3, Sass, Material UI, Tailwind CSS, Shadcn UI, Bootstrap

Programming Languages: TypeScript, JavaScript

Backend: Node.js, Express.js, REST APIs, MongoDB, SQL

Tools: Git, Jira, GitHub, Codex, ChatGPT, Claude, GitHub Copilot, Docker, Monday

CMS: WordPress, Shopify

PROFESSIONAL EXPERIENCE

FRONTEND WEB DEVELOPER (Remote) - Ignition Group PLC - UK (Aug 2021 - Sept 2022)

- Built a wattage calculator using React and Redux that generated tailored electric heating product recommendations.
- Applied Redux Ducks modular architecture for scalable state management and CSS Modules for organised styling
- Converted an existing Magento site into a Progressive Web App (PWA)
- Delivered new features within large existing codebases while refactoring legacy code for performance and maintainability
- Collaborated closely with the other developers on several projects
- Used Slack and PHPStorm Code With Me for effective remote collaboration

FRONTEND WEB DEVELOPER (Remote) - UXIA Agency (Digital agency - Paris, France) - March 2021 - August 2021

- Developed responsive UIs from wireframes & optimised web assets for performance

- Delivered multiple client websites under tight deadlines in a fast-paced agency environment
- Collaborated daily with design and marketing teams
- Maintained and updated existing client websites with Shopify and WordPress
- Managed tasks using Monday

FRONTEND WEB DEVELOPER (Remote) - Unsourced Digital (Web Development agency - Vienna, Austria) - Dec 2020 - Jan 2021

- Built and enhanced features using React and TypeScript
- Implemented responsive UI using Tailwind CSS and SCSS
- Wrote clean and maintainable code

FEATURED PROJECTS - [GITHUB](#)

E-COMMERCE - for the works of an artist

Full-stack e-commerce website with admin dashboard for product management, secure authentication and multilingual support. Implemented rate limiting and using Helmet for security. Frontend deployed on Vercel and backend on Render.

Tech stack: React, Redux, Material UI, TypeScript, Node, Express, MongoDB

PROFESSIONAL DEVELOPMENT (2022–2026)

After having worked for 3 companies in three different countries as a Web Developer, during my break, I:

1. Developed real-world projects including an advanced e-commerce application and an artist portfolio. This period allowed me to develop stronger product thinking by owning projects from idea to deployment. Deepened knowledge in backend development, security, system design, internationalisation and performance optimisation
2. Travelled across Asia for 18 months.
3. Helped create a community garden and practiced organic agriculture
4. Supported a close family member through health issues

LANGUAGES

English - Native

French - Advanced

ADDITIONAL EXPERIENCE

TEAM MEMBER - The Longboat Restaurant (Premier Inn restaurant) | York, UK | Sep 2019 - Nov 2019

EDUCATION

SELF-STUDY - WEB DEVELOPMENT COURSES
